

STAY COOL AND HAPPY WITH COOLSAVERSM

IN ASSOCIATION WITH

Tune it up for better performance!

A CoolSaver A/C Tune-up can improve the cooling output and efficiency of your air conditioning unit by up to 27 percent. A program-qualified technician will identify ways to improve the efficiency of your air conditioner and implement any recommended improvements.

With a CoolSaver A/C Tune-up, you may:

- Be more energy efficient
- Enjoy a cooler and healthier indoor environment
- Improve humidity control
- Receive a free or discounted tune-up

To qualify, you must meet the following criteria:

- Be a residential (single-family homes only) or commercial customer within the CenterPoint Energy Houston Electric service territory
- Receive service from a participating REP (listed to the right)
- Have a working central A/C or heat pump that is 25 tons or less (commercial) or five tons or less (residential) and at least one-year-old
- Have not received a CoolSaver Tune-up in the last five years

Note: Geothermal, window units, mini-split systems and chillers are not eligible. Multi-family homes, including apartments, townhomes, and condominiums, are not eligible to participate.

The CoolSaver Program is implemented by CLEAResult and sponsored by CenterPoint Energy Houston Electric.
